The amendment received 21 April 2006 has been made of record. Claims 1-7 and 14-17 are pending.

The indication of allowability of claims 14-17 contained in the previous office action was in error since these claims were simultaneously rejected under 35 USC 112.

The rejection under 35 USC 102(b) contained in the previous office action is withdrawn in view of applicants' amendments.

Claims 1-7 and 14-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-7 and 14-17 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for specifically named carrier fluids, does not reasonably provide enablement for all possible fluids which could be reasonably considered as "naturally derived". The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims.

Each of these rejections is maintained as set forth in the previous office action. Applicants' definition of "naturally derived" found in the specification is not a closed end definition. It does not specifically delineate species which applicants consider suitable but leaves the claims open to any number of species which applicants may or may not consider suitable.
